

## City of Muskegon 2024 Road & Utility Construction Project Summary

**Project Name:** Lead Service Line Replacements (Campbell Field, Apple Ave, Oakview)

**Project Type:** Water service pipe replacement project including new water service pipes from the water main to the meter inside the home.

**Contractor:** SWT Contractors

**City Neighborhood(s):** Campbell Field, Nelson, McLaughlin, Angell, Steele, Sheldon Park, Oakview

**Project Summary:** A small portion of many of the water service pipes in the listed areas (the pipe that brings water into your home) is made of lead. The city is working to replace all water service pipes that have that small piece of lead, and the time has come for your service line to be replaced. The state requires the pipe be replaced all the way to your water meter, which is probably inside your home. The contractor will need to get to your water meter and work in that area as part of the replacement. In the meantime, your water is safe to drink.

In the maps below you can see the specific project plans. *We are still waiting confirmation from the contractor as to which homes in the Oakview neighborhood will be involved in this project in 2024.*

**Changes to Expect:** You'll have a new water service line from the water main to your water meter. You may get a new water meter as part of this project.

**Timeline/Timeframe:** The contractor has until August of 2026 to replace the service pipes and will reach out to each homeowner sometime before that date to set up a time for replacement. They may reach out very soon, or they may reach out a year or two from now, so please be patient.

**Lane, Road or Intersection Shutdown:** For most of the properties included no traffic will be impacted by this work other than small closures for just a few hours when a service is replaced. If your home is on Apple Avenue, you may see lane closures at the time of the work.

**Contractor Project Update Link:** None
