Residents within the Amity Avenue Project Area

RE: City of Muskegon – Street and Utility Improvements – Amity Avenue: Getty to Fork

Dear Property Owner(s):

Beginning April 2021, construction will be taking place on Amity Avenue, between Getty and Fork Street, and one block on Fork Street between Amity Avenue and Murphy Avenue. The City will also be replacing only the sanitary sewer for one block on Myrtle Avenue between Fork Street and Murphy Street and on Murphy Street from Myrtle Avenue to Walton Street.

This project will consist of replacement of both the sanitary sewer and watermain pipes in the roadway and reconstruction of the roadway. The project also replaces the sanitary service to the property line and the water service to the house. As part of the water service replacement, the contractor will need access into your house to make the final connection. The City has contracted with Kamminga & Roodvoets, Inc., from Grand Rapids, to complete this project. Fleis & VandenBrink Engineering (F&V) of Muskegon will be providing engineering and construction observation for the City during the project.

Construction Schedule & Contacts

The construction schedule is anticipated to begin in April 2021 and completed in November 2021. If you have any questions or concerns regarding the project, please contact the City of Muskegon Department of Public Works or F&V at the numbers below.

Kamminga & Roodvoets, Inc. - (616) 949-0800
Adam Khodl, Project Manager

City of Muskegon - (231) 724-4100
Department of Public Works
Leo Evans, Director of Public Works

Fleis & VandenBrink - (231) 726-1000
Danell P.E. Project Engineer
Don DeVries, Project Manager

Work will generally be conducted between the hours of 7:00AM and 7:00PM on Monday through Friday, with possible work on Saturdays. We ask that residents stay out of the construction area during and after work hours and be aware of construction equipment in the area.

Access

During each phase, the affected roads will be closed but will stay accessible to residents in the immediate construction area throughout the project, except for short periods of time when pipe will be installed across the roads. Individual driveway access can be interrupted for a few hours, but in all cases will be restored by the end of the workday. Orchard and Allen Avenue will be the posted detour.

Driveways and Restoration

Driveways that are disrupted during construction will be replaced at the same location, and equal in size and type to the existing drive. Temporary driveway material will also be placed and maintained to provide access to residences during construction. Disturbed grass areas will be restored with topsoil, seed, fertilizer, and mulch.

If you have underground sprinklers installed along the road, please mark the heads and approximate locations of the pipe and if possible, remove the heads. The Contractor will attempt to avoid damaging irrigation systems however if they are damaged, they will repair them, if marked. Damage to unmarked irrigation is the responsibility of the property owner.

Mail

The Contractor will make the necessary arrangements with the postal service to assure uninterrupted mail delivery.

Garbage Pick-up

The Contractor will make the necessary arrangements with the appropriate waste management companies to assure uninterrupted garbage pickup. **Please write your name and address on your garbage bin in a visible location to assist in returning your bin to the proper house.**

Water Services

Many of the water services within the project area will be replaced up to the meter in the building, or up to 18 inches into the building if the meter is located within the right-of-way.

If your water service is scheduled for replacement, the contractor will be contacting you during the construction period to schedule your water service replacement. The contractor will temporarily require access into your building before, and during, installation.

Sincerely,

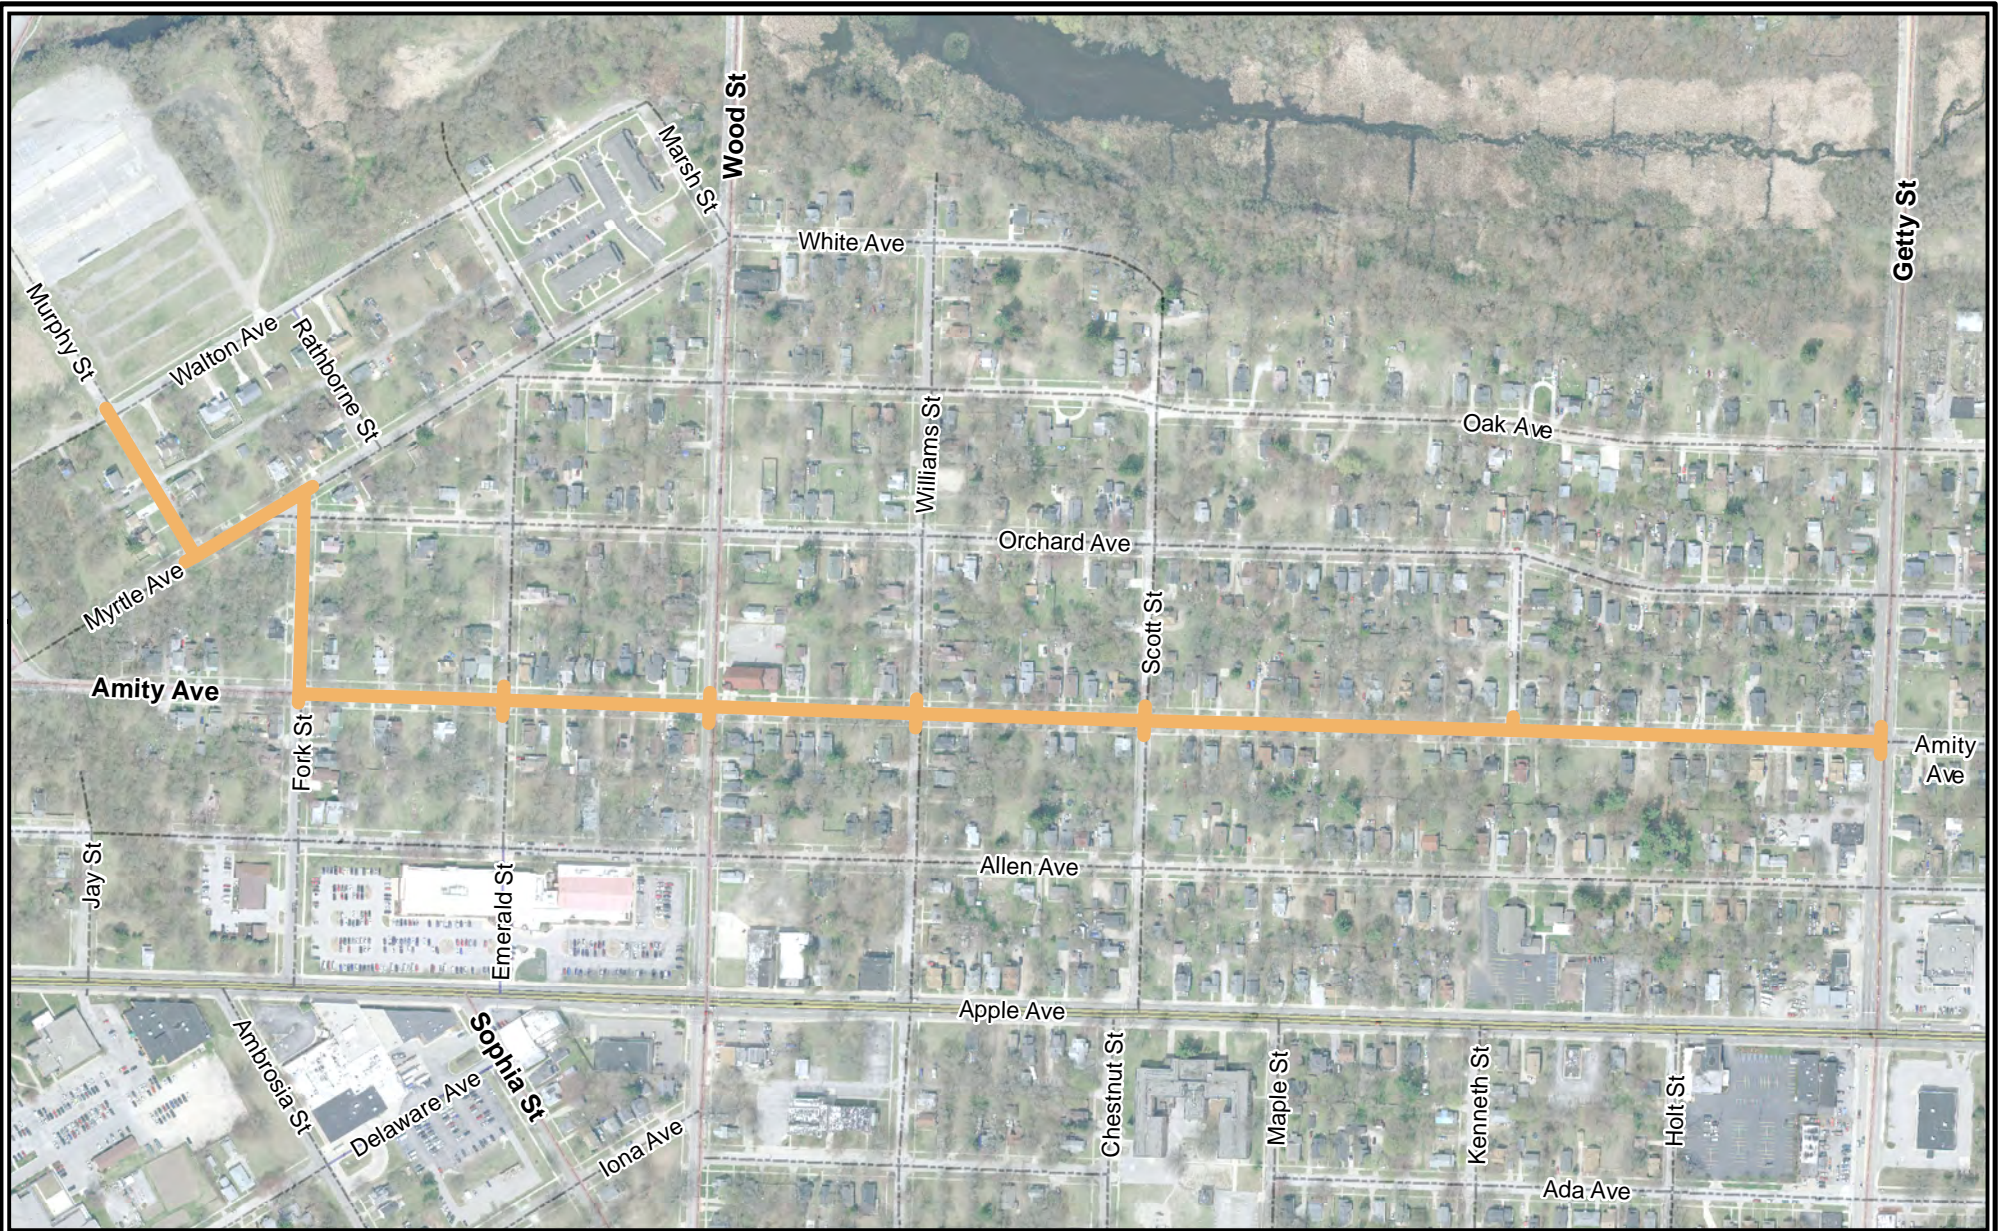

City of Muskegon

Leo Evans, P.E.

City of Muskegon Director of Public Works
