

Addendum 01

Project: **RFP – AutoCad Standards and Templates**

Date: Tuesday October 28, 2025

PROJECT OVERVIEW

1. The RFP did not mention a date for deliverables to be issued to the City. The majority of deliverables are to be issued to the city by November 1, 2026; so that staff can utilize for winter design.
2. Clarification – The city has requested 80 hours of time from selected firm.
Provide 80 hours (useable in one-hour minimum periods over the course of one year), separate from the training program, for as-needed questions and support.
This time period is to start after all deliverables and on-site training in completed.
